

MCHHS Service Equity Assessment Staff Survey - Analysis

Total surveys analyzed: 378

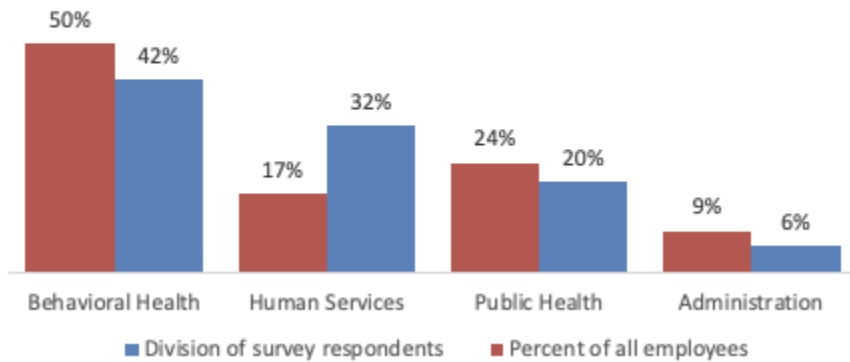

Section A: Introductory Questions

Survey Q1-2 and 6

The behavioral health division had the most responses, and nearly half (43%) indicated they were clinical service staff. The majority of respondents (89%) are full time employees. Eight percent are temporary employees and 3% part time employees.

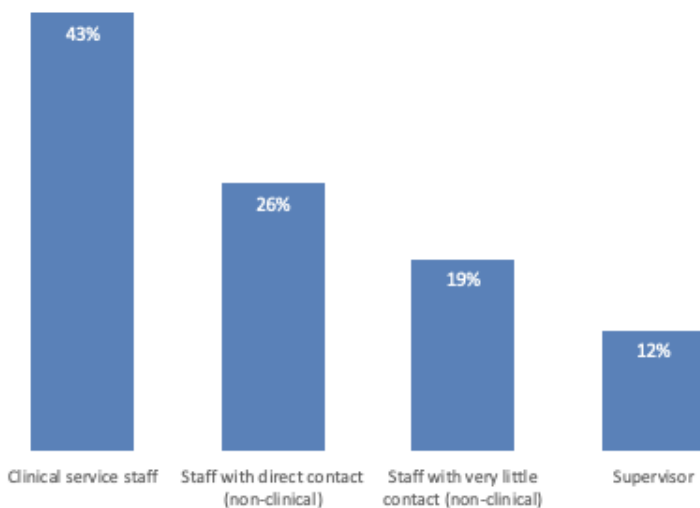

Survey Q2

Division of survey respondents compared to division of all employees

Survey Q# 1

Which best describes your position in the MCHHS?

Survey Q# 3 or4

Length of Service of Respondents, by years

Survey Q#93-98

Demographics

We asked a series of demographic questions to understand the characteristics of survey respondents. The majority of respondents identify as white, English speaking, heterosexual, woman, have not served in the US Military, or have any sort of disability. See figure XX below for the demographics of survey respondents.

Demographics of survey respondents

Section B: MCHHS Planning and Policies

Organizational commitment to addressing inequities in the communities MCHHS serves

Survey Q#7

Respondents were asked to list what they thought were the top five disproportionately and unjustly distributed health and quality of life issues in the populations served by MCHHS. Figure XX displays the nine themes that at least 10% of respondents identified. Some additional themes that came up included:

- MCHHS staffing issues (8%)
- Health insurance (8%)
- Violence/stigma/stressors (8%)
- Service gaps (6%)
- Criminal justice system (5%)
- Childcare (4%)
- Disabilities/IDD (4%)
- Technology (2%)
- STIs (2%)
- COVID (2%)

**Disproportionately and unjustly distributed health and quality of life issues in the populations served by MCHHS
(Respondents identified multiple issues so total equals more than 100%; n=263)**

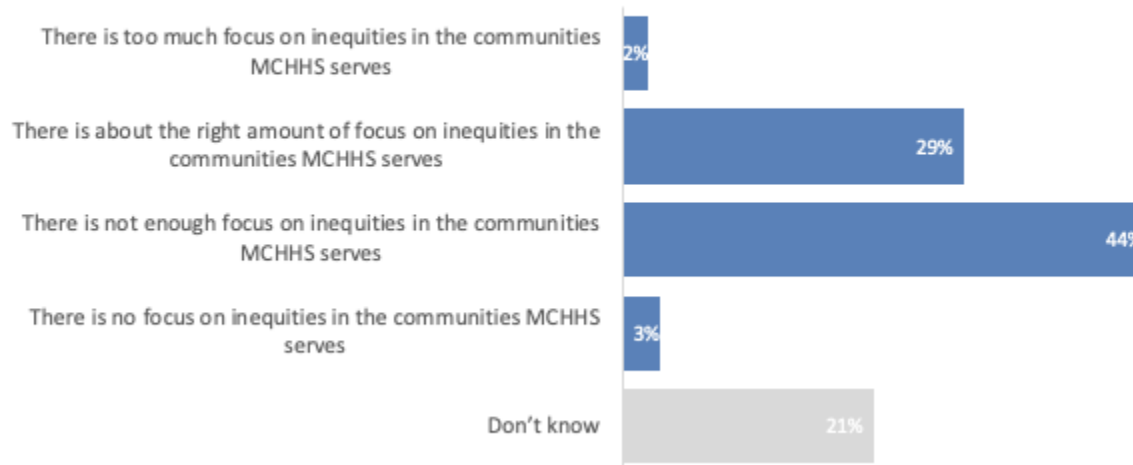

Additionally, 3% of staff did not know or did not feel there were any disproportionately and unjustly distributed health and quality of life issues. One respondent stated, “I have not witnessed anything being unjustly distributed during my time working for MCHHS.”

Survey Q#8

Survey respondents were asked a series of questions about their perceptions of MCHHS’ commitment to addressing inequities in the communities MCHHS serves. The following tables display their responses.

In your opinion, how much does MCHHS focus on addressing inequities in the communities MCHHS serves? (N=377)

Survey Q#9-11

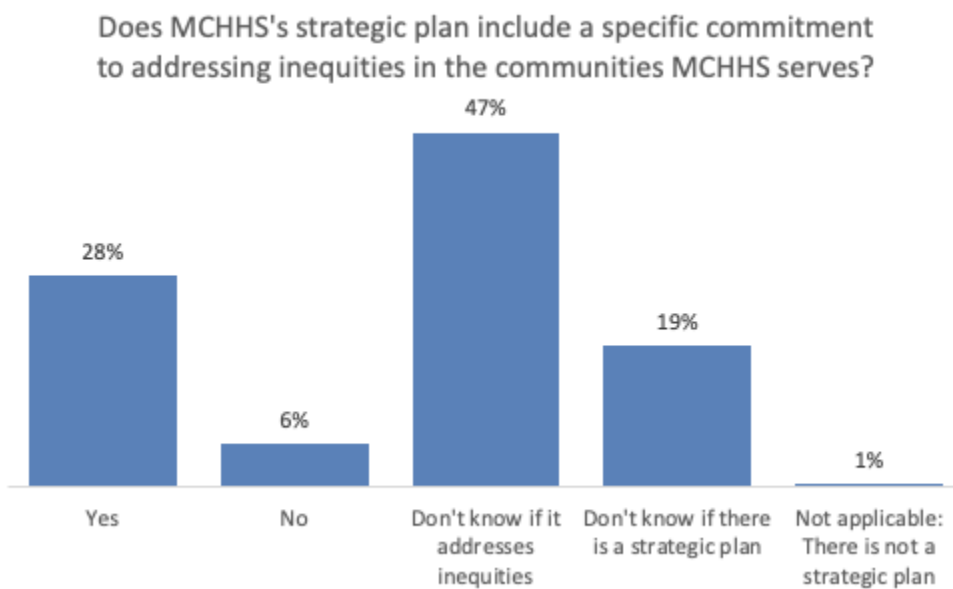

Survey Q#12-14

Strategic Planning

Survey Q#15

Survey Q#16

Staff were asked What role(s) community members and organizations play in MCHHS strategic planning. The following table displays responses. Over 50% of respondents said they did not know. “Other” responses include, “superficial role,” “very little,” and “input from community partners and agencies is attained only right before a state or federal audit.” Respondents could select all that apply, so the percentages equal more than 100%.

In your experience, what role(s) do community leaders, residents, and community-based organizations that support populations experiencing inequities in the communities MCHHS serves play in strategic planning? (Check all that apply)	
Collect feedback from larger groups of community members and communicate the feedback to MCHHS	27%
Contribute input in the beginning of the strategic planning process	24%
Maintain active involvement throughout the strategic planning process	22%
Review strategic planning documents and give feedback	20%
Participate in the decision-making of the strategic planning process	18%
Other	2%
None	4%
Don't know	54%

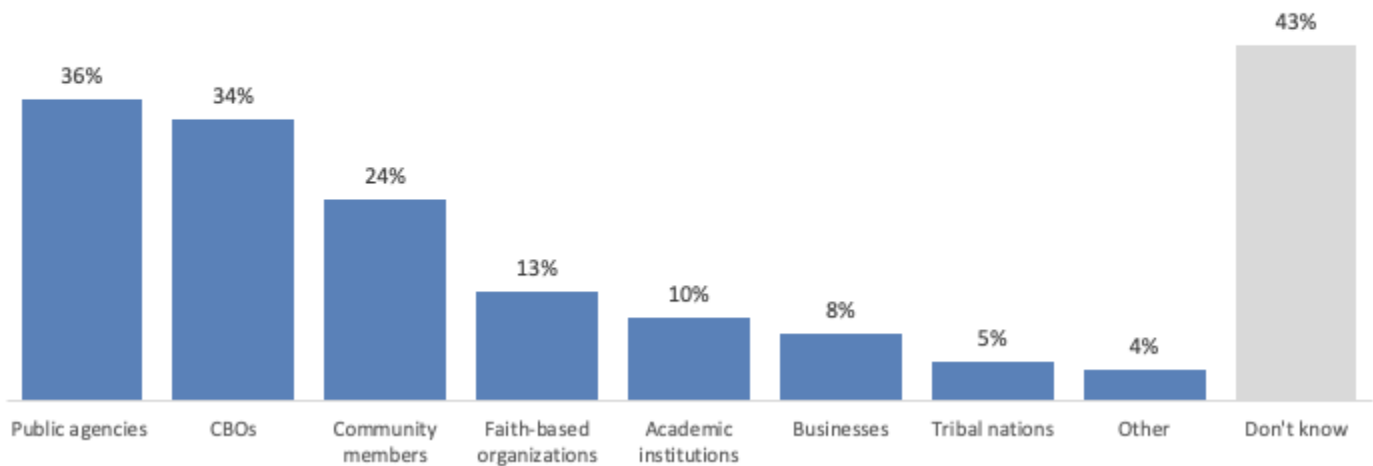

Program and Service Planning

Survey Q#

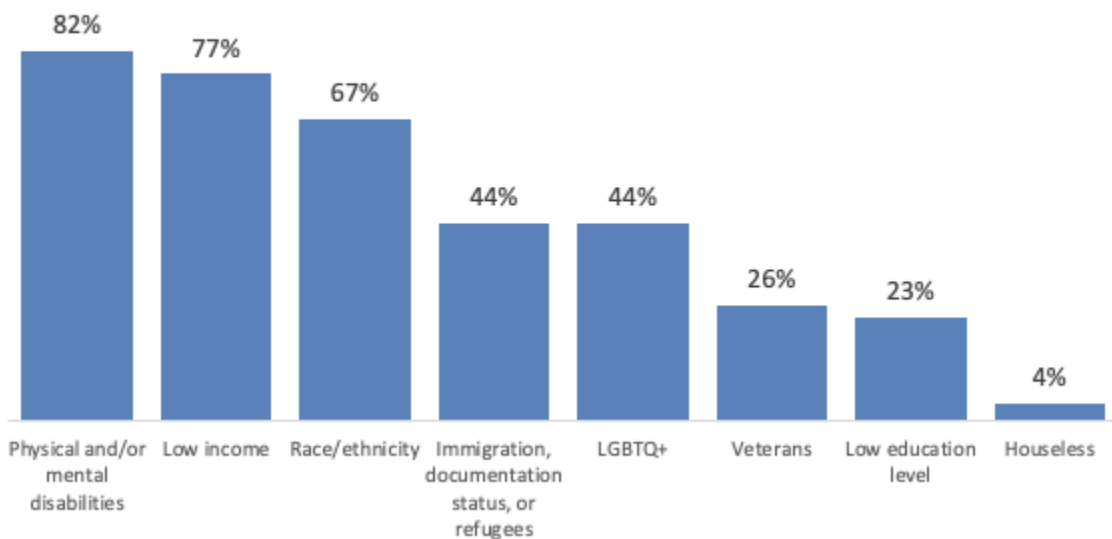

Shifting from strategic planning to program and service delivery, survey respondents were asked how much all levels of staff are involved and what partners outside MCHHS are engaged. If respondents selected Community Based Organizations (CBOs), they were also asked if those CBOs focused on any specific populations; 58 people answered this second question.

What groups outside of MCHHS, if any, are usually involved in program and service planning processes for your area? (Check all that apply.) (N=379)

In your experience, has MCHHS worked with CBOs that focus on the following populations? (Check all that apply) (N=57)

Respondents were asked to reflect on whether or not their role includes aspects of addressing inequities. Depending on the role, 11 - 30% of staff did not feel this applicable to their job duties. However, with the exception of two categories (“developing policies and plans that support individual and community health and quality of life efforts” and “enforcement of laws and regulations that protect health and ensure safety”), over 50% of staff strongly agree or agree that they have a role in various aspects of equity work.

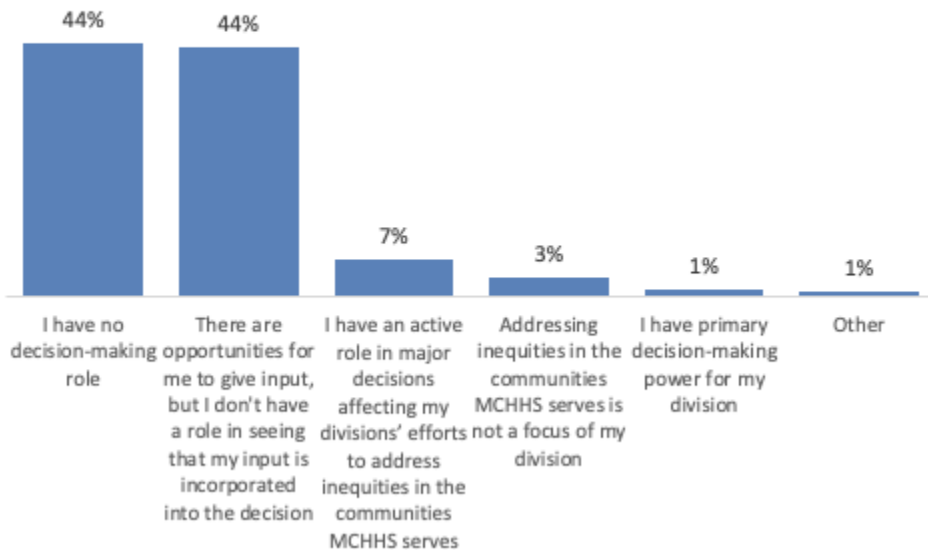

Section C: Collaboration Within MCHHS

The next set of questions were designed to better understand what aspects of MCHHS make internal collaboration possible and how different kinds of collaboration within MCHHS function.

The next section focused on decision-making and transparency at MCHHS. The majority of respondents (88%) felt they either have no decision-making role or that there are opportunities for input but they have no role in making sure their input is utilized. Additionally, over 50% of staff feel that they only sometimes or rarely know why a decision was made that affects their job at both the division and program level.

What role do you have in making decisions that affect division-wide efforts to address inequities in the communities MCHHS serves?

When asked about the culture of learning at MCHHS, most respondents strongly agree or agree that staff are encouraged to learn about the environmental, social, and economic conditions that impact inequities in the communities MCHHS serves.

Section D: Working with the Communities MCHHS Serves to Address the Environmental, Social, and Economic Conditions that Impact Inequities

The next section of the survey focused on MCHHS’s collaboration with the communities MCHHS serves to address the environmental, social, and economic conditions that impact inequities.

The majority of respondents indicated that they understand the demographics of the communities MCHHS serves (68%), as well as the major inequities impacting them (70%). Additionally, the majority of staff know where to go to find out more information (62%).

Part of understanding the work MCHHS does in the collaboration with the community is knowing what types of organizations MCHHS staff engage with. The figure below displays answers to this question. Half of respondents work with CBOs, and one quarter work with groups that advocate for improved living conditions and/or community members not affiliated with an organization. Respondents could select all that apply. “Other” responses included schools, 12 step recovery groups, businesses, health care, adult foster care, vocational rehab, animal rescue organizations.

Which types of community groups, if any, do you work with as part of your job at MCHHS? (N=379)	
Community-based organizations (CBOs)	51%
Groups that advocate for improved living conditions	25%
Community members not affiliated with an organization or group	25%
Youth development/leadership groups	18%
Faith-based groups	17%
Neighborhood groups	10%
Other	5%
None of the above	25%
Don't know	10%

Those that selected CBOs as a community group they worked with were asked if any of the CBOs they work with focus on any specific populations. Respondents were able to select all that apply. “Other” responses included COVID, mental health, youth, houseless, and recovery.

You indicated that you work with CBOs to reverse inequities in the communities MCHHS serves. Which of the following populations do you work with? (N=149)	
Physical and/or mental disabilities	69%
Low income	64%

Race/ethnicity	53%
Low education level	44%
LGBTQ+	39%
Immigration, documentation status, or refugees	30%
Veterans	23%
Other	9%

In the next section of the survey, staff were asked to describe their division’s approach to working with communities. Between 23-42% of respondents indicated they did not know. To note, 46% of respondents felt that the MCHHS division they work for has trusting relationships with external partners, and another 24% feel that their division is moving in that way. However, 15% felt that there are not strategies in place to support community participation, and 2% felt that there are not deliberate efforts made to build capacity of community members to advocate on issues of equity. More than half of respondents felt that a range of culturally and linguistically appropriate programs and services are provided by MCHHS (53%), and that their division provides oral and written materials that meet cultural, linguistic and literacy needs of the community (62%). More respondents indicated that they didn’t know than agreed that regular assessment of cultural and linguistic needs are conducted (42% vs. 33%) and that data is collected and shared in an appropriate manner for the community (39% vs. 38%).

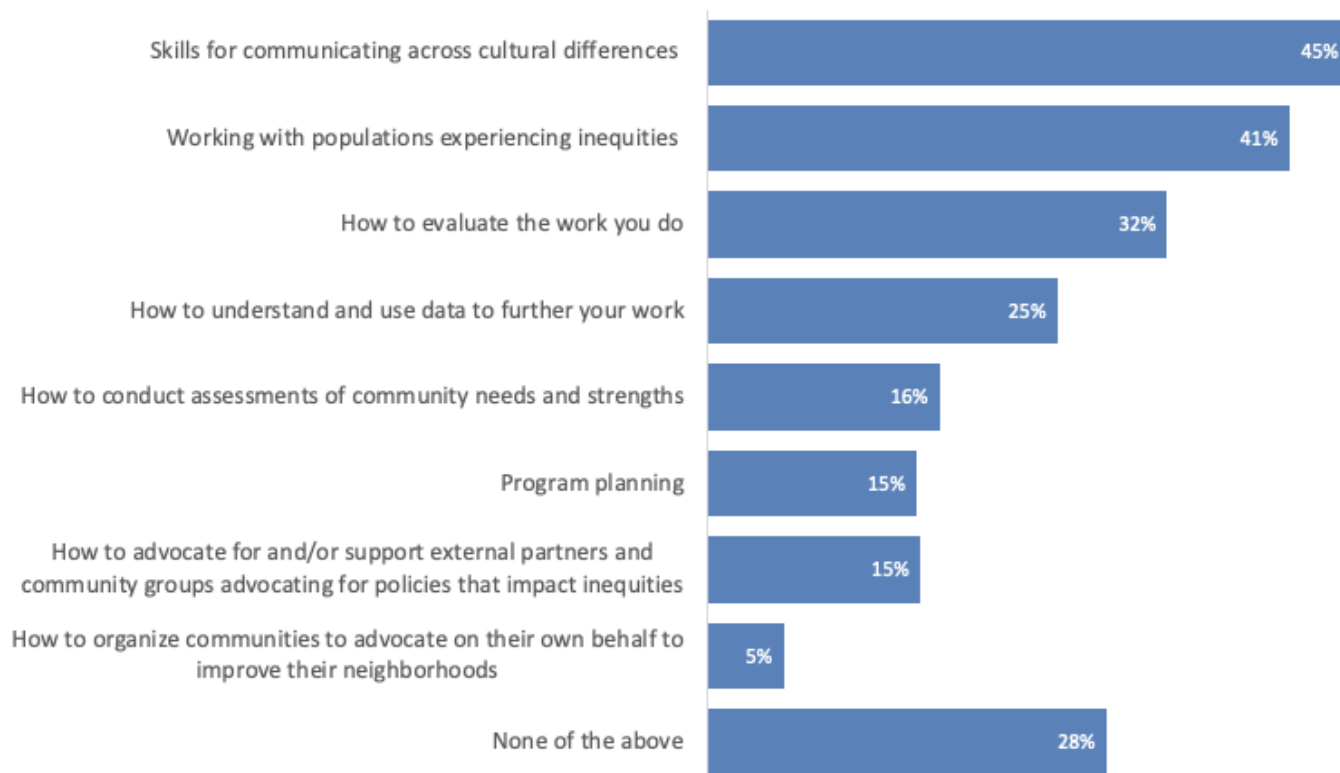

Section E: Supporting Staff to Address Inequities in the Communities MCHHS Serves

Since you have been working at MCHHS, have you ever received training about the different ways health and human services can address the environmental, social, and economic conditions that impact populations experiencing inequities in the communities MCHH

Topics MCHHS staff have received training, mentorship and/or guidance in since working at MCHHS. Respondents could select all that apply.

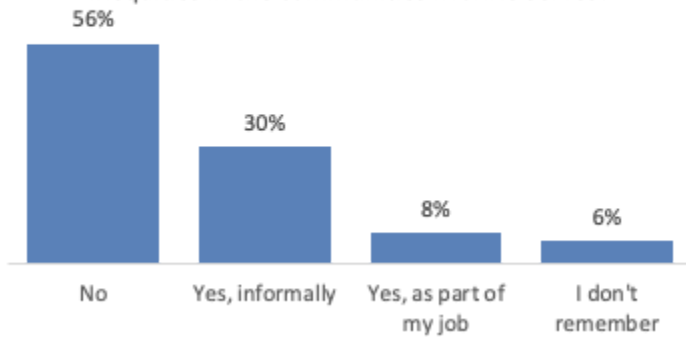

The first set of questions in this section asked about various training opportunities that may be available. Staff were asked if they were encouraged to use and if they did use the various opportunities to further their understanding of inequities in the communities MCHHS serves.

	Encouraged to use...	Used...
mentoring/coaching	21% yes 56% no 7% not applicable/MCHHS doesn't offer 16% don't know (N=376)	63% yes 19% no 18% not yet but plan to (N=78)
tuition reimbursement for a relevant class or certification	12% yes 74% no 6% not applicable/MCHHS doesn't offer 9% don't know (N=376)	46% yes 46% no 8% not yet but plan to (N=50)
conferences, trainings, professional development opportunities, or workshops	52% yes 36% no 1% not applicable/MCHHS doesn't	75% yes 11% no 14% not yet but plan to

centering on populations experiencing inequities	offer 10% don't know (N=376)	(N=197)
other professional development opportunities, including (self-reported opportunities): <ul style="list-style-type: none"> • Networking • Reading literature • Technical assistance • Webinars • Online trainings • Poverty simulation • Supporting disaster response 	29% yes 49% no 3% not applicable/MCHHs doesn't offer 20% don't know (N=376)	62% yes 17% no 21% not yet but plan to (N=106)

Have you provided mentoring or coaching to other staff to support them in addressing inequities in the communities MCHHS serves?

I have opportunities to talk with my supervisor(s) and/or manager(s) about the impact of our work on the environmental, social, and economic conditions that impact populations experiencing inequities in the communities MCHHS serves.

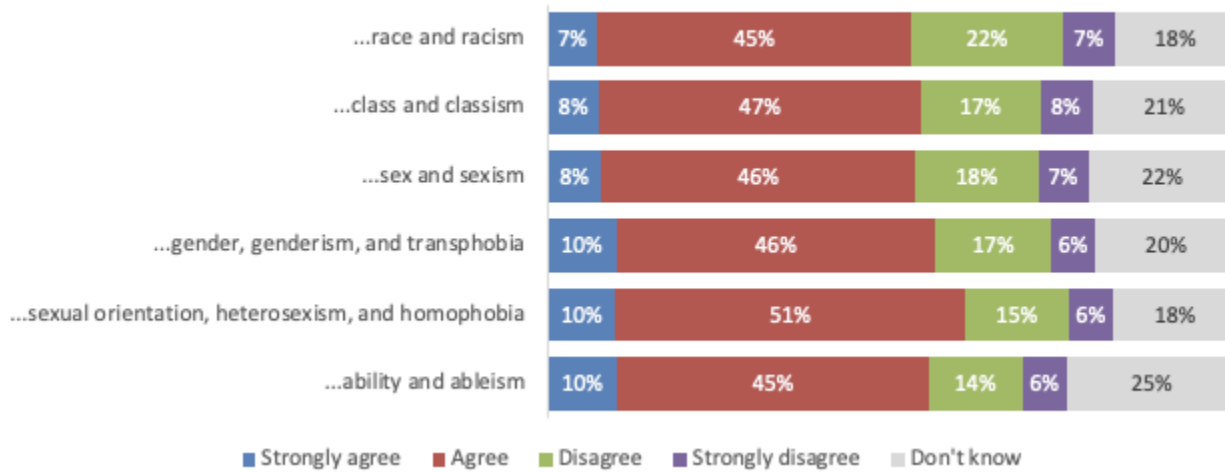

Within my division we have engaged in group discussions about how our work could address one or more of the environmental, social, and economic conditions that impact populations experiencing inequities in the communities MCHHS serves.

■ Strongly agree ■ Agree ■ Disagree ■ Strongly disagree ■ Not applicable to my job duties ■ Don't know

Staff I interact with at MCHHS are comfortable talking about...

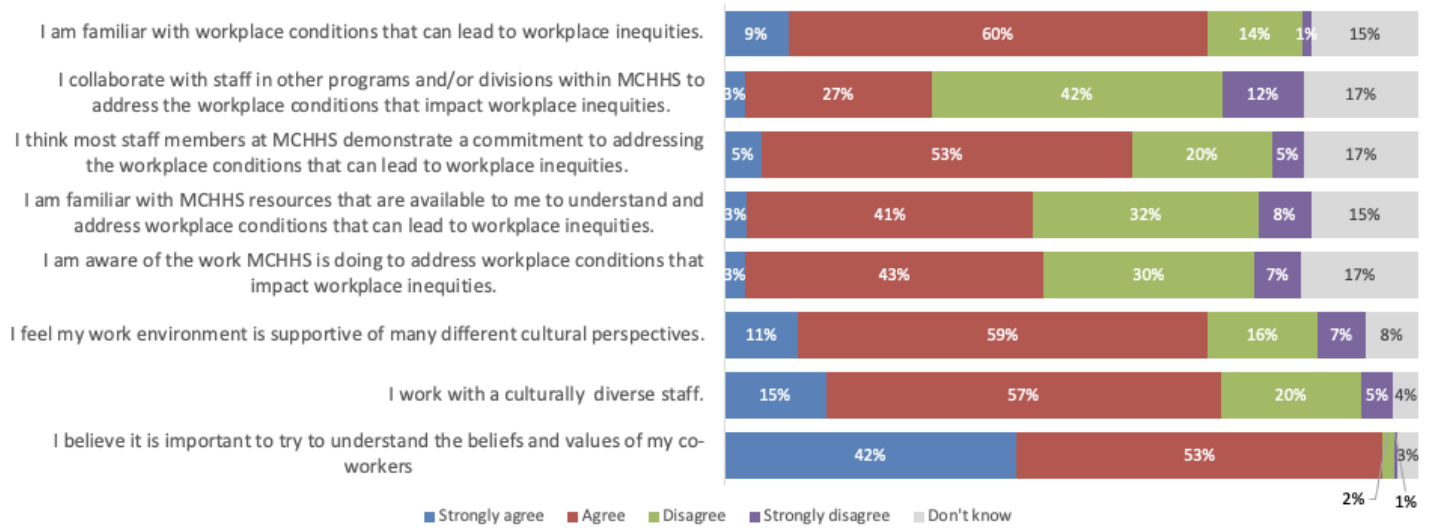

Management I interact with at MCHHS are comfortable talking about...

Section F: Working within MCHHS to Address the Workplace Conditions That Impact Workplace Inequities

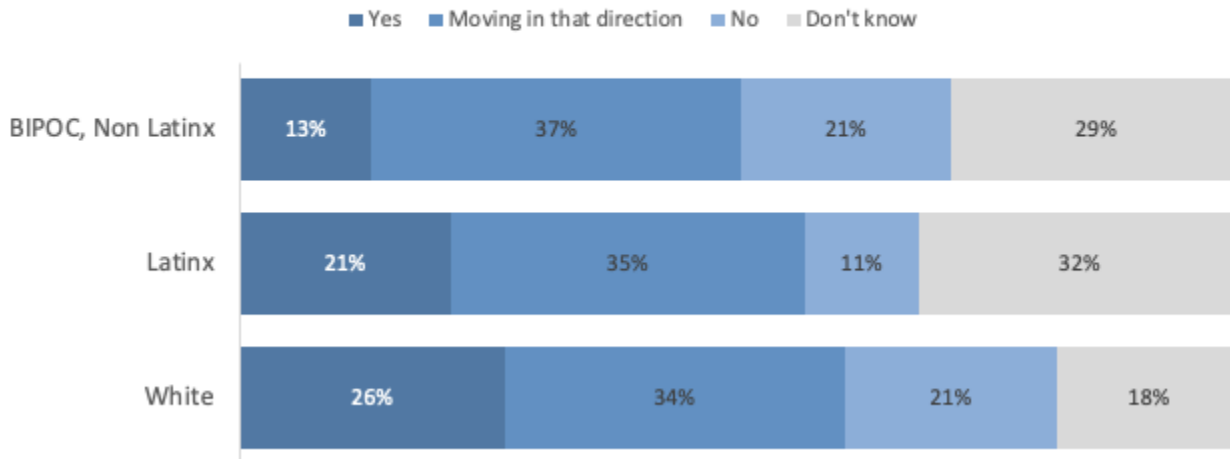

The next set of questions focus on workplace inequities within MCHHS.

MCHHS's approach to workplace inequities

The work to build a culture of equity, diversity, and inclusion at MCHHS is shared among all staff so that the burden of solving equity issues is not left solely to those experiencing inequities. by race (n=350)

The work to build a culture of equity, diversity, and inclusion at MCHHS is shared among all staff so that the burden of solving equity issues is not left solely to those experiencing inequities. by sexual orientation (n=345)

Recruitment, hiring, and retention of diverse staff at MCHHS

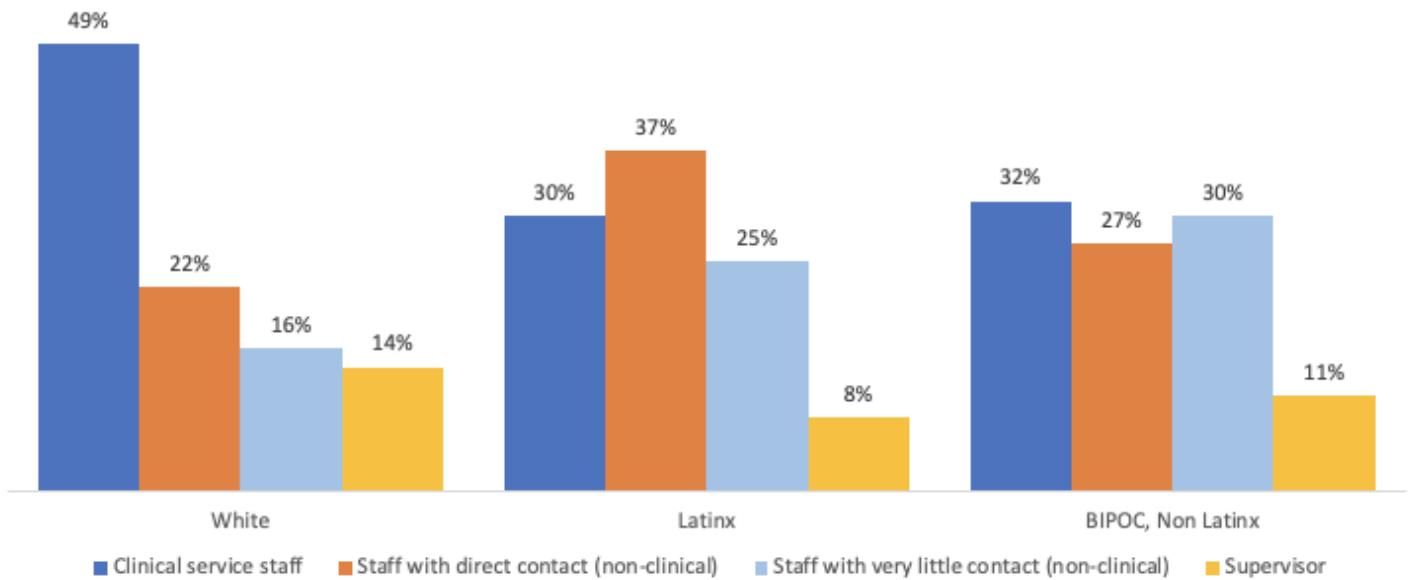

Analysis by race of respondent

Note about categories for race/ethnicity: Due to low sample sizes, respondents who indicated their race/ethnicity was something other than White or Latinx were combined into one category called BIPOC, Non Latinx. BIPOC stands for black, indigenous, people of color.

Sample sizes:

- White = 251
- Latinx = 65
- BIPOC, Non Latinx = 37

Position type by race

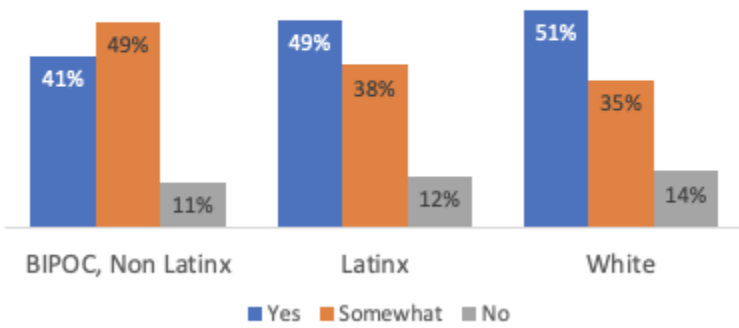

In your opinion, how much does MCHHS focus on addressing inequities in the communities MCHHS serves? By race/ethnicity of respondent

Mission statement adequately demonstrates a commitment to addressing inequities, by race of respondent

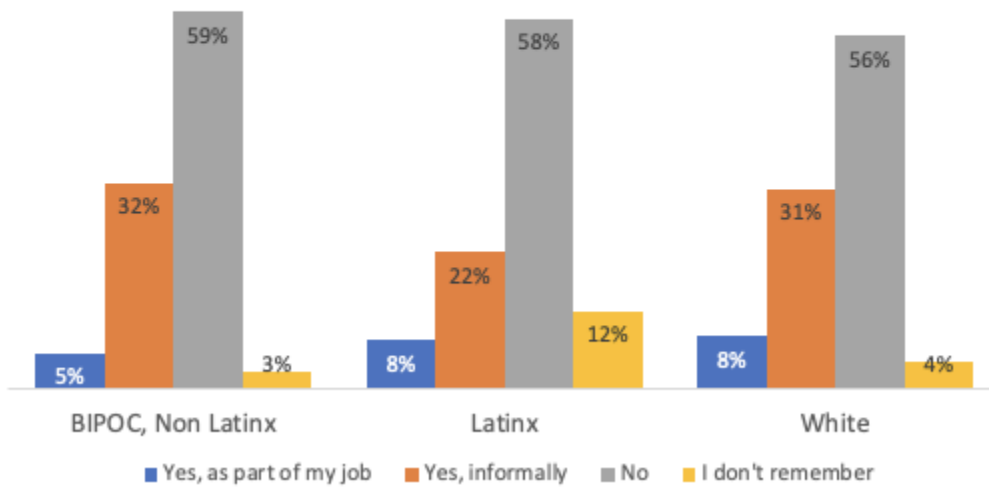

Vision adequately demonstrates a commitment to addressing inequities, by race of respondent

Values adequately demonstrate a commitment to addressing inequities, by race of respondent

Have staff provided mentoring or coaching to other staff to support them in addressing inequities? By race of respondent.

I have opportunities to talk with my supervisor(s) and/or manager(s) about the impact of our work on the environmental, social, and economic conditions that impact populations experiencing inequities in the communities MCHHS serves. By race of respondent.

Within my division we have engaged in group discussions about how our work could address one or more of the environmental, social, and economic conditions that impact populations experiencing inequities. By race of respondent

Staff I interact with at MCHHS are comfortable talking about...	by race of respondent	Strongly agree	Agree	Disagree	Strongly disagree	Don't know
...race and racism	BIPOC, Non Latinx	14%	32%	19%	14%	22%
	Latinx	3%	46%	17%	6%	27%

	Latinx	5%	38%	16%	5%	38%
	White	11%	52%	9%	7%	21%

I feel my work environment is supportive of many different cultural perspectives. By race of respondent.

The work to build a culture of equity, diversity, and inclusion at MCHHS is shared among all staff so that the burden of solving equity issues is not left solely to those experiencing inequities. By race of respondent.

I am ready to take action to make MCHHS a more equitable place to work. By race of respondent

MCHHS actively recruits culturally diverse staff members. By race of respondent.

When hired, culturally diverse staff members remain long-term employees of MCHHS. By race of respondent.

In my experience, staff of diverse cultural backgrounds are equitably promoted throughout MCHHS. By race of respondent.

I believe I have a good chance of being promoted within MHCCS. By race of respondent

I feel that MCHHS gives reasonable accommodations for any seen and unseen abilities/disabilities. By race of respondent.

Analysis by sexual orientation

Note about categories for sexual orientation: Due to low sample sizes, staff who indicated their sexual orientation was anything but heterosexual were combined into one category called Sexual Minority.

Sample sizes:

- Heterosexual = 305
- Sexual Minority = 43

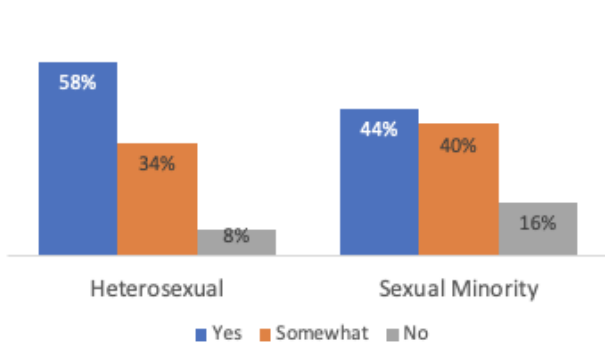

Position type by sexual orientation (n=345)

In your opinion, how much does MCHHS focus on addressing inequities in the communities MCHHS serves? By sexual orientation of respondent.

Mission statement adequately demonstrates a commitment to addressing inequities, by sexual orientation of respondent

Vision adequately demonstrates a commitment to addressing inequities, by sexual orientation of respondent

Values adequately demonstrate a commitment to addressing inequities, by sexual orientation of respondent

Have you provided mentoring or coaching to other staff to support them in addressing inequities? By sexual orientation of respondent.

I have opportunities to talk with my supervisor(s) and/or manager(s) about the impact of our work on the environmental, social, and economic conditions that impact populations experiencing inequities in the communities MCHHS serves. By sexual orientation

Within my division we have engaged in group discussions about how our work could address one or more of the environmental, social, and economic conditions that impact populations experiencing inequities. By sexual orientation of respondent.

Staff I interact with at MCHHS are comfortable talking about...	by sexual orientation of respondent	Strongly agree	Agree	Disagree	Strongly disagree	Don't know

I feel my work environment is supportive of many different cultural perspectives. By length of time at MCHHS.

The work to build a culture of equity, diversity, and inclusion at MCHHS is shared among all staff so that the burden of solving equity issues is not left solely to those experiencing inequities. By length of time at MCHHS.

I am ready to take action to make MCHHS a more equitable place to work. By length of time at MCHHS.

MCHHS actively recruits culturally diverse staff members. By length of time at MCHHS

When hired, culturally diverse staff members remain long-term employees of MCHHS. By length of time at MCHHS

In my experience, staff of diverse cultural backgrounds are equitably promoted throughout MCHHS. By length of time at MCHHS.

I believe I have a good chance of being promoted within MHCCS. By length of time at MCHHS

I feel that MCHHS gives reasonable accommodations for any seen and unseen abilities/disabilities. By length of time at MCHHS
