

OHA CBO Public Health Equity Funding Outcomes Evaluation
 Workshop 3 Notes: Theory of Change
 Sept. 7, 2023

	Group 1	Group 2
Facilitator	Vashti	Jill
Support Person	KC	Elena
Number of attendees	14	19
Notes	<p>Purpose Statement:</p> <ul style="list-style-type: none"> The second sentence on CBO purpose statement doesn't feel complete <p>Theory of change:</p> <ul style="list-style-type: none"> Long term-outcome: <ul style="list-style-type: none"> Question regarding the first long-term outcome on shared leadership, because they don't envision being able to have a shared leadership as an entity Is shared leadership a PH restructuring? Difficult to identify the steps to move the needle of Program goal, and shared leadership with OHA doesn't reflect community emphasis What is <i>long-term</i> mean Large emphasis on "shared leadership" in second goal, it means to change the PH system entirely. Instead of "restructured" what if we focus on harm reduction Activities: 	<p>Purpose Statement:</p> <ul style="list-style-type: none"> Agree with the statement Something to highlight: goal is that communities get the care and resources they need sooner rather than later, timely access to services that benefit them Maybe too many "ands" in the last sentence Nobody expressed hesitation with moving forward with the current working statement <p>Theory of change:</p> <ul style="list-style-type: none"> Program goal: <ul style="list-style-type: none"> Concerns about using the words "Eliminate" and "eradicate" due to uncertainty about achieving those goals. Positive response to the goal of elimination as an important mindset. Suggestion to use a semicolon before "and" in a sentence for improved clarity. Appreciation for referencing historical and contemporary injustices but a request for clarification on their meaning. Caution about using "thriving" and "achieving well-being" as they may trigger or traumatize some

- Far more comfortable with “modernize PH structure to emphasis community voice with focus on equitable resources”
- CBO would love to see investment to do equity capacity trainings, CBOs are always seeking equity funding.
- CBOs need funding to collect quality data
- OHA asked for CBO community engagement coordinators to connect with OHA in order to know what they are looking for
- The ratio of managing and reporting on the funds granted to CBOS to performing the mission of our CBOs is a careful balance - one all good partners need to keep top of mind

- **Program Goal:**

- the wording could be reversed, the first statement should follow after the second sentence

communities.

- Alternative proposal: "Oregonians experience improved support, health, and well-being."
- Some indifference towards including the word "support" as it's implied in the goal.

- **Long-term Outcomes:**

- Formatting needs improvement for the list of outcomes.
- Appreciation for involving the community in a new way within the public health system.
- Suggestion to clarify the target audience for the outcome regarding "equitable access to information."
- Emphasis on ensuring community involvement throughout planning, implementation, and evaluation.
- Questioning the measurability of "equitable access to information."
- Strong approval for the first outcome.
- Positive reception of the second outcome with acknowledgment of potential limitations.
- Consideration of measures of success and evaluation methods for the outcomes.
- Suggestion to simplify the wording of the first outcome for clarity.
- Emphasis on keeping the concept of community central in each outcome.
- Echoing the need for outcomes to be measurable and suggesting a separate column for this in the logic model.
